

## MODERN COMMERCIAL REFRIGERATION SYSTEMS FOR THE FOOD SERVICE INDUSTRY

*Featherweight  
Design*

### FEATURING:

- All Weather Ultra-Light Anodized Aluminum 6060 Panels, Plenums, Integral Louvers and Control Panel.
- Ultra-Light Aluminum modular frame made of T5 Grade and ISOGALSi12Cu components.
- Reduced Electrical Consumption and Increased heat dissipation.
- Reduced Refrigerant volumes required.
- Single point electrical connection and weatherproof within the system frame.
- Dual Pressure Controls with every compressor.
- Aluminum Fins / Copper Tubing Standard Condenser
- Crankcase Heaters, Suction Filters, Sight Glasses, Driers and Liquid Line Ball Valves  
All brazed with Silfos® Silvaloy®15 shipped standard on every system.

### OPTIONS:

- Hermetic / Semi-Hermetic / Digital Scrolls and Screw Compressors Options.
- Redundant 100% Uptime Systems available.
- Hail-Guard Condenser Protection System and Vertical Air Discharge options.
- Weather-Coated and Copper/Copper Condensers available.
- Parallel and Water Cooled Systems available.
